## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-10 are allowed.
2. The following is an examiner's statement of reasons for allowance: The claimed disk drive power source as set forth in claims 1 and 9 that handles an emergency power off event that includes an adjustable voltage source that is responsive to a tester output, that outputs a second voltage that is applied as an input to the capacitor is neither taught by nor an obvious variation of the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kanda et al. (US006594102B1) teaches a control capacitor having a control voltage that corresponds to a retraction distance of the head. Stupeck et al. (4,786,995) teaches to use a capacitor during a head retract operation. Klassen (US006567232B1) teaches the use of two capacitors in a retract operation to return a bouncing actuator to a parking position.
